Jennifer,

I took a stab at writing the EPA responses to the NAS questions based on our conversation with NCI yesterday. I awards you the first crack at editing before sending to Barbara for distribution to the others.

Tom

Subject: Issues and questions for June 11th call

Attached is a set of issues raised by the NRC committee that reviewed the formaldehyde assessment pertaining to the statistical modeling of the data on formaldehyde exposure and cancer mortality that were relied on to derive the inhalation unit risk value. I hope that it will help guide our discussions next Tuesday (June 11th at 9:30 am) . Thanks again for agreeing to meet with us. I am looking forward to the call.

Regards, Barbara Glenn
